

RESCOTT PRODUCTS & SERVICES

Rescott offers a full range of hosted services, giving you access to secure, reliable, full-featured messaging and collaboration solutions that don't require the investment and ongoing management resources to deploy them on your own.

MICROSOFT EXCHANGE 2010

Increase your business's efficiency with Hosted Microsoft Exchange 2010. Exchange 2010 includes many new features to help your employees boost their productivity by offering a consistent inbox, calendaring, and contacts experience across the PC, browser, and mobile phone.

Exchange 2010 offers an enhanced Outlook Web App that can be accessed from Firefox and Safari browsers, in addition to Internet Explorer. Plus, enhancements to mobile access allow you to extend the productivity benefits of Exchange to workers even when they're away from their PC.

Only **Rescott** offers hosted Exchange 2010 with a 99.999 percent financially-backed uptime SLA.

MICROSOFT OFFICE COMMUNICATIONS SERVER 2007

Microsoft Office Communications Server 2007 from Rescott offers your business secure instant messaging, presence and unified communications in a hosted solution, giving you all the productivity benefits without the IT management challenges.

Hosted OCS 2007 provides a secure and professional alternative for instant messaging and unified communications. Features include:

- **Free / busy status – integrated.** Hosted OCS users can see whether colleagues are available, away, busy or offline. It integrates with Outlook, SharePoint and the desktop client Office Communicator. So if a user has a meeting from 10am to 11am, they will automatically display as "busy" in Office Communicator
- **Conversations are saved.** OCS lets users save and search IM conversations inside Outlook, just like their email.
- **Secure and private.** Secure instant messaging allows users to send messages with end-to-end encryption so sensitive information is never at risk of being hacked.
- **Higher productivity.** PC-to-PC file transferring functionality allows instant document-sharing, increasing productivity and efficiency.

WINDOWS SHAREPOINT

Hosted Windows SharePoint is a powerful platform for building shared document repositories, corporate Intranets, and project specific website. There is no hardware or software to manage, and accessible anytime, anywhere through a web browser.

Windows SharePoint is designed to increase productivity. Businesses of any size can leverage SharePoint to create document storehouses to increase collaboration within a company and between a company and its partners, vendors and customers.

With Windows SharePoint you can share documents, calendars, contacts, links, ideas and more, without wasting time exchanging inefficient emails.

MOBILE EMAIL SOLUTIONS

Hosted mobile email solutions let you easily and quickly enable secure, robust, business-grade mobile email for BlackBerry® and ActiveSync-enabled PDAs and smartphones. Using "push" technology, mobile email solutions give you all of the features of your PC- or browser-based email right from your mobile phone.

No matter your mobile device, platform or wireless carrier preference, our solutions will help you stay connected to colleagues, partners, and customers so you can keep your business moving no matter where you are.

MESSAGEMIRROR

MessageMirror provides your business with a simple, powerful archiving solution for storing, retrieving and searching all the emails sent and received through your hosted Exchange service.

With MessageMirror you can:

- Keep backup copies of emails
- Recover deleted items
- Reduce primary mailbox size
- Conduct cross-mailbox searches

BUSINESS PRODUCTIVITY SUITE

Business Productivity Suite offers you a complete package of business email and collaboration services, delivered as a hosted service, with no deployment, zero maintenance and no upfront costs.

Business Productivity Suite is an integrated package of the following hosted services:

- Microsoft Exchange 2010
- Microsoft Office Communication Server 2007
- Windows SharePoint 3.0

The Business Productivity Suite is offered for a low monthly fee – delivered to you as a turnkey solution, ready to go from the start.

HOSTED EXCHANGE SERVICE ADD-ONS

A number of additional features can be added to your Hosted Exchange service to increase your productivity and security.

- **Resource Mailbox:** a simple and efficient way to utilize resources like meeting locations and equipment.
- **Company Disclaimer:** add HTML or text disclaimers to your messages to communicate a company-wide email policy.
- **Compliant Archiving:** retain your email and electronic records for compliance with HIPAA, Sarbanes-Oxley and other regulations.
- **Directory Link:** sync username/password and other user attributes between your on-premise and hosted applications.
- **Policy-based Encrypted Email:** Easily encrypts emails based on company-wide rules and policy you set up and manage — all without disrupting day-to-day workflow.

HOSTED PBX: SIMPLIFY YOUR BUSINESS' PHONE SERVICE

With Rescott's hosted PBX, you and your company get powerful features that give you even more control over your communications.

- Use voice menu to set up an automated attendant to answer and route your incoming calls.
- With hunt groups, you can direct calls to a group of employees like Sales or Support so that important calls are answered and addressed quickly.
- Enjoy predictable costs with a flat-rate, per-user monthly charge with unlimited calling in the US and Canada.
- With toll-free numbers, give your customers an easy way to contact you.
- Manage your users and features with online administration through Rescott's control panel.

ONLINE DATA BACKUP: SAVE YOUR DATA AND YOUR BUSINESS

Data loss can occur at any time: a hard drive could crash, a laptop could be lost or stolen, or users could inadvertently – or intentionally – delete important data. The task of backing up PC-based files and folders can be expensive and challenging for any company, especially if you have employees who travel or who work in remote locations.

With Rescott Online Backup, you can easily back up the critical business information that is created and stored across all the desktops and laptops in your company, without disrupting the day-to-day workflow of your employees.

Administrators manage Online Backup directly from the end user control panel, including adding new machines, viewing backup status for each machine, restoring data backup sets, and viewing storage usage.

DOCONFERENCE WEB CONFERENCE PLATFORM

DoConference is Rescott, LLC own Web Conferencing solution for small to medium businesses. DoConference's ultra-smooth video handling and features not found in competitors' products makes DoConference the solution of choice for trainers, sales representatives, corporate executives and educators.
