Glossary

▲ Up Arrow

Indicates that your site moved up.

Indicates that your site moved up into the top three pages.

▼ Down Arrow

Indicates that your site moved down.

Indicates that your site moved down out of the top three pages.

Baseline Date

This is the date that your baseline report was generated.

Comparison Date

The date your comparison report was generated. This is after our work was completed.

Web Page

The page in your site that showed up in search results.

Search Ranking

Your websites current position in the search results.

Results Page

The page in the search results where your website appears. Each page shows 10 search results. For example, if your Search Ranking position is 15, the results page would be page 2.

About this report

This report shows search results at a moment in time. Most search engines maintain numerous data centers around the world from which they serve search results. They are always synchronizing with one another so it is possible for two people in two different places to see slightly different search results even if they searched for the same phrase at the same moment. Furthermore, most search engines update portions of their search indexes regularly, and search results can change from day to day.
